

General Manager,  
Mayor and Councillors  
Kempsey Shire Council,  
22 Tozer Street,  
West Kempsey  
NSW 2440.

8<sup>th</sup> October 2017

Dear Manager, Mayor and Councillors,

You are hereby given notice of Non-Consent by the will of the signatories of the notices of Non-Consent presented to the above mentioned by way of the general council meeting.

Although the notices are also directed to other parties, it needs to be understood that even though the directive came from the NSW Department of Health, the NSW Department of Health and Federal Government have imposed responsibility of the fluoridation of local water supplies onto local councils, whether they have been directed or not, the buck stops with council.

In 2014 ABC News reporter Bruce MacKenzie reported, “the State Government voted down a bill that would have seen it assume responsibility for the fluoridation of drinking water. The Opposition introduced the bill after a number of councils on the state’s north coast had heated debate on the issue.” You don’t need to be solicitor to figure out why this is the case.

Kempsey Council was directed by the Health Department to fluoridate in 2004 due to Kempsey Council resolving to refer the matter to the Director General of the NSW Health Department and in such cases the Health Department makes it quite clear, as can be found on their internet site, that the NSW Health department makes only one decision and that is to direct the council to fluoridate. However this does not make the Health Department automatically responsible and indeed the department has made it quite clear that local councils are responsible and in this case Kempsey Council who took the initiative to bring it before the NSW Department of Health. If you are the Manager and Councillors at this present time and you do not reject fluoridation of our water supplies and as a consequence our water ways, then you are taking responsibility for it as a council and as individuals.

The most important factor in any humane society would be to do what is best for the health and welfare of the community. It is unfortunate that we still see today the pressure and influence of ongoing funding and so forth based decisions that determine what is to be forced upon a community. Again, this community has fought for fluoride free water for over fifty years and we will not stand by and watch while what we want, which is best for our community's health and welfare over the past fifty years is ignored. We have all seen the money driven impact of tobacco, asbestos and Thalidomide to name a few. It's time to wake up, become aware and educated, to be proactive in what is best for our community despite the pressures from outside the community, which is what you were all voted in to do. From the old adage, if they told you to stick your hand in the fire, would you? There is wisdom to be gained here.

Council and individual Councillors have already been supplied with numerous studies from around the world, (no doubt why most of the world refuses to fluoridate), which far out weigh the number of studies the Health Department have supplied and which clearly show the findings of serious adverse health effects. More recent data has become available on serious adverse health effects on children, the elderly, those with chronic health conditions and especially on our aboriginal population's health, so as more studies are conducted more proof is being produced on this toxic substance.

For those who find money is the most important issue, despite having made numerous requests to council for the ongoing costs associated with fluoridation, no figure has been forthcoming, why is this?

Whitsunday Regional Council with a population of 34,626 as at 2016 found that they were flushing \$363,500 per annum worth of fluoride down the toilets and drains. The cost to fluoridate Port Macquarie Hastings Council is \$280,000 p/a. The NSW Health Department fine for non-compliance is 50 Units, which is \$5,000 plus \$550.00 daily, that being \$200,750 per annum. You don't need to be an account to see the cost savings presented.

If we withhold contaminating our water, which can't be taken out once it has been introduced we will be respecting our communities wishes, protecting our community and saving a very considerable amount of money in the short and long term, especially in light of infrastructure damage fluoride is known to cause, a win, win, situation.

It would be good practice to calculate the cost of making available the regulated dosage of fluoride tablets, except the NSW Health Department has as of 2017 banned the sale and distribution of fluoride tablets except from dentists, that's how safe fluoride is. How can you justify uncontrolled dosage for any one person when it is based on consumption and exposure? This is the responsibility you have taken on remember, not the NSW Health Department or any other government body.

We do not give our consent to fluoridate us and you are responsible for the decision you make in regard to this, as a Councillor and as an individual.

I request that while you are taking time to make your decision, knowing the consequences of fluoridated water on breast and bottle fed babies, information which has previously been supplied to you by me, that you take the compassionate initiative

to inform the residents of South West Rock's of the First ever US Government funded studies findings on Prenatal Fluoride Exposure and Cognitive Outcome in Children at 4 and 6-12 Years of Age in Mexico, which found neurological damage to the extent that their IQ was reduced by 5 points, so that they can make an informed decision whether or not to expose their babies to the toxic industrial waste by-product already introduced into their water supply. After all, you would want that same right in regard to your own children, wouldn't you?

Thank you

Yours Sincerely

(On behalf of the signatories to the notices of Non-Consent to fluoridation of Kempsey Shire water supplies)

**NOTICE OF NON-CONSENT: BY ORDER OF MY WILL AS A CITIZEN OF AUSTRALIA**

To: The Manager, The Mayor and all Councillors of Kempsey Shire Council and all Honourable Elected Members of the Legislative Assembly of the Federal Parliament and that of all the States and Territories of Australia and to all Elected and Non-elected Local Government Councils and Public Service Bodies or Independent Advisors.

Re: Notice of Non Consent by Order of My Will and that of the People of all the States and Territories of Australia, draws to the attention of all that which has come before or that should come before all Parliaments and or Local Government Councils, Bodies, Corporations or Agencies, be of My Will and that of the Will of the People of Australia.

This **NOTICE of NON-CONSENT** is pursuant to adding S6 Poison, Industrial Fertiliser Waste or Aluminium Waste, Fluoride, which may contain Arsenic, Mercury, Barium, Lead, Beryllium, Polonium and other, to my water supply.

As an Australian Citizen and Water Customer, **I DO NOT AUTHORISE, NEITHER DO I CONSENT** to my Commonwealth, State or Territory Governments or any other such Body or Water Supplier making this decision regarding my health or water by having added or proposing to add S6 Poison Fertiliser Waste or Aluminium Waste, Fluoride Toxic Chemicals, which may contain Arsenic, Mercury, Barium, Lead, Beryllium, Polonium as mass medication, to my Household Water Supply, putting my health and that of my family at risk. The overwhelming scientific evidence and case history reports, at [www.fluoridealert.org](http://www.fluoridealert.org), clearly demonstrates that S6 poison Industrial fertiliser, aluminium waste, fluoride toxic chemicals cause major and costly health problems. These problems include, brain dysfunction, thyroid dysfunction, nervous system impairment, brittle bones, dental and skeletal fluorosis, calcification of the Pineal Gland, lowers IQ, spontaneous abortions, still births, birth defects, infertility, kidney failure, hormone disruption, enzyme inhibitor, chemical sensitivities, cancer and death. Fluoridation stimulates severe Violent Tendencies.

The ethics of medicine and healthcare dictate that the "informed consent" of the subject must be obtained before commencing any treatment, preventive or otherwise. I, or my family have never authorized any level of Government, Bodies, Corporations, Agencies or Water Suppliers to act as my health care practitioner or prescriber. By forcing mass medication or debilitating carcinogenic substances upon myself or my family without my consent, are a criminal offence and a direct violation of the Nuremberg Code, to which Australia is a signatory.

This letter is my Notice that I have independently informed myself and that; it is MY WILL to withhold MY CONSENT to treat myself and my family with S6 Poison Fertiliser Waste, and or Aluminium Waste, Fluoride Toxic Chemicals.

**I HEREBY STATE THAT: IT IS MY WILL THAT THIS PRACTICE BE STOPPED IMMEDIATELY.**

Please respond in writing within thirty (30) days after the receipt of this Notice, to either agree to cease or not proceed with the fluoridation of my water supply. I invite you to confirm your personal support for the removal of such after having viewed the scientific evidence link herein. If you choose not to respond within this period of time, it shall be legally deemed that you endorse the fluoridation of my water supply and therefore accept full responsibility for your part in this heinous crime against myself, my family and the citizens of Australia and may well be held accountable for such in a Court of Law.
